Heba Qasem

Data Scientist | Backend Developer | Freelancer | Building Scalable APIs & Data-Driven Solutions

Palestinian Authority

Summary

From building backend systems to exploring the world of data and machine learning.My journey has always been driven by curiosity and the desire to keep learning. ?Hi! I’m Heba A Computer Systems Engineering,a software engineer by foundation, and a Data Science & Machine Learning enthusiast by passion.I started my journey in backend development,where I learned how to design and build reliablesoftware systems using technologies like Java, Spring Boot, databases, and APIs.Along the way, I discovered a passion for turning data into insights and using machine learning to solve meaningful problems. !I want to build intelligent solutions that connect technology with real-world needs.I believe that the best solutions come from combining strong engineering foundations, analytical thinking, and a deep understanding of the problem we are trying to solve. ?Explore and apply Machine Learning techniques to solve real-world problems.Analyze data to discover insights and support better decisions.Continuously learn and grow in the fields of Data Science, AI, and technology. , ...Data Science & Machine Learning | AISoftware Engineering | Backend DevelopmentLearning journeys | Career growth I believe technology should solve problems, not just create features.I believe continuous learning is the key to becoming a better engineer. Python | Machine Learning | Data AnalysisPandas | NumPy | Scikit-learnSQL | DatabasesJava | Spring Boot | REST APIsGit | Docker ’ I’m always open to connecting with people passionate about technology, data, and building meaningful solutions.Feel free to DM me, exchange ideas, or follow my journey.You can also reach me by email at: Hebaalqerem2003@gmail.com.

Experience

IBT Learning

Machine learning & Data Science

January 2026 - April 2026 (4 months)

Data Science & Machine Learning program covering the full data science pipeline — from data exploration and SQL to advanced deep learning and model deployment.
Topics covered:

Python & SQL for Data Science
Data Exploration & Mathematical Foundations
Machine Learning I & II (Tree-Based Models)
Neural Networks, RNNs & CNNs (Deep Learning Architectures)
Natural Language Processing & Large Language Models
Time Series Analysis & Recommendation Systems
Reinforcement Learning
Model Deployment & Front-End Interface for Models
Data Engineering Foundations

Education

Palestine Technical University - Kadoori

Bachelor's degree, Computer Engineering · (September 2021 - September 2025)
